AFRICA. In-and-Out 0+

In the year of ecology in Russia **EXPOSED** Gallery, **South African Embassy** in Russian Federation and World Wildlife Fund (**WWF**) has prepared a new photo project 'AFRICA. In-and-Out'.

Part of the funds* received from the sale of tickets will be used to support the environmental projects of WWF Russia.

This new photographic project combines two perspectives, one internal and one external, of the Bushveld, a unique sub-tropical woodland ecoregion of Southern Africa, which is home to a large and varied collection of mammals, birds, reptiles, trees, grasses and flora.

'AFRICA. In' - is the view of Riaan Fourie, a highly skilled and experienced South African Field Guide and Tracker who has lived and worked in the Bushveld for the last twenty years. His constant presence, keen eye and love of photography have enabled him to capture moments often hidden from the eyes of visitors.

'AFRICA. Out' - is the view of professional Russian photographer Olga Konovalova. In 2016 and 2017 she was a guest of this amazing land and instantly fell in love with its beauty and tranquility, together with the serenity, grace and occasional brutality of the animals and birds which make this area their permanent or temporary home.

The exhibition comprises a range of stunning photographs capturing the essence of the region, together with a beautiful slide movie presentation. The works are presented in several high quality formats and sizes.

The partner of the project - the [SHINE](#) travel agency - will conduct a **drawing of a certificate** of \$1000 for a trip to South Africa from among all visitors to the exhibition.

Also in the program: special WWF Day, aquagrim for children at weekends and other activities and gifts from project partners.

The latest news of the project is available:
